Banki Marketing Materials

Note: can also see README.md for most the marketing materials as well.
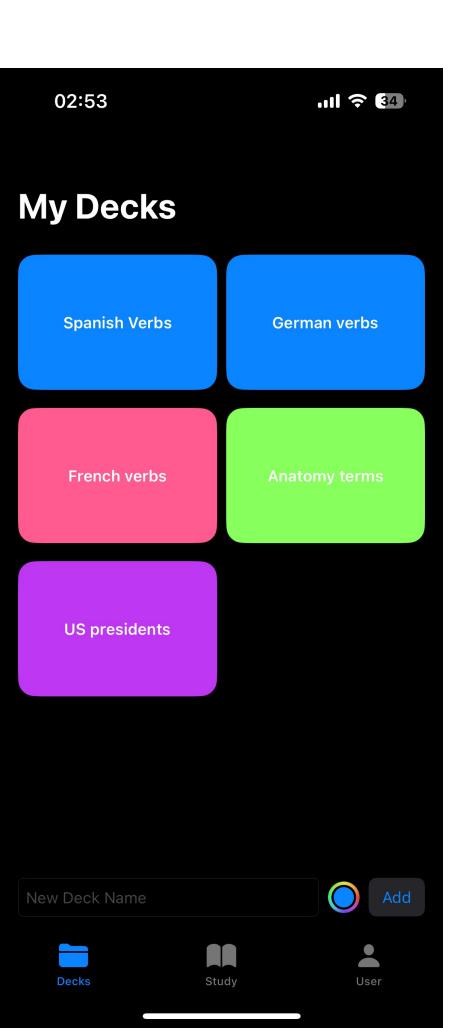

Category:

Education

Description:

The Flashcard App is designed to help users study and retain information efficiently by using flashcards. The app enables users to create decks of flashcards, each with a question and answer, and track their progress as they study. It features an intuitive interface, offering an easy way to study and review material by swiping through cards. Users can mark cards as "correct" or "incorrect" to adjust the order in which they appear based on their proficiency. The app helps learners retain knowledge by adapting the order of cards according to their recall accuracy.
